

# Combination Water Meter 50mm-100mm

型号	公称口径	产品名称	销售代号
LXF	50mm-100mm	复式水表	

## 复式水表

### COMBINATION METER

专用于测量流经自来水管道的水体积总量的流量测量仪表  
MEASURING THE VOLUME OF POTABLE WATER PASSING THROUGH THE PIPELINE

#### 特点：

- \* 复式水表，由二种大小口径的水表组成。
- \* 自来水通过管道流通的水源计量范围从小口径水表最小流量到大口径水表的流量。
- \* 复式水表结构先进，计量范围大，始动流量小，使用、维修方便，适合非连续大流量供水之用。

#### FEATURE:

- \* Combination meter, which is composed by large diameter and smaller diameter water meters.
- \* It measures the water which passes from the pipes with its min flow of the smaller water meter and its max flow of the larger ones'.
- \* The combination meter has high quality structure, large extent of metering, low starting flow rate, and is very convenient to be fixed and repaired. This type of water meter is fit for large capacity noncontiguous flow rate water supply system.
